

GRADHIGHLIGHTS

CASCA's Graduate Student Committee (GSC) is launching a new program this year: GRADhighlights!! Our goal is to present one interesting research highlight per month in a brief format which is accessible to undergraduate students in the physical sciences who are interested in active research.

What we want from you!

- an elementary level explanation as to what the visual shows and why it is significant (context)
- an explanation pertaining to how it was obtained (e.g., observations using X, simulations using Y)
- a connection to CASCA
